University of Southampton

My awesome thesis dissertaion title

Monika Kudelska

Submitted in part fulfilment of the requirements for the degree of
Doctor of Philosophy at the University of Southampton, June 1, 2020

Abstract

This files is where I write the abstract in tex for the front matter

Contents

Abstract	i
List of Tables	v
List of Figures	vii
List of Abbreviations	ix
Declaration	xi
Acknowledgements	xiii
1 Introduction	1
2 Methods	3
3 First Results	5
4 Second Results	7
5 Discussion	9
Appendices	9
A Title of appendix	13
B Title of appendix	15
References	17

List of Tables

4.1 A table of the first 10 rows of the mpg data set	7
--	---

List of Figures

3.1 Car engine size versus fuel efficiency	5
--	---

List of Abbreviations

DNCB : 2,4-Dinitrochlorobenzene

DPCP : Diphenylcyclopropenone

HaCaT : Keratinocyte cell line

LC : Liquid Chromatography

MS : Mass Spectrometry

MS/MS : Tandem mass spectrometry

Declaration

I, Monika Kudelska

declare that the thesis entitled:

My awesome project

and the work presented in it are my own and has been generated by me as the result of my own original research.

I confirm that:

1. This work was done wholly or mainly while in candidature for a research degree at this University;
2. Where any part of this thesis has previously been submitted for a degree or any other qualification at this University or any other institution, this has been clearly stated;
3. Where I have consulted the published work of others, this is always clearly attributed;
4. Where I have quoted from the work of others, the source is always given. With the exception of such quotations, this thesis is entirely my own work;
5. I have acknowledged all main sources of help;
6. Where the thesis is based on work done by myself jointly with others, I have made clear exactly what was done by others and what I have contributed myself;
7. None of this work has been published before submission.

Signed:

Date:

Acknowledgements

I would like to thank my Teddy and Terry for distracting me in the production of this thesis dissertation.

Chapter 1

Introduction

Background and introduction chapter

Equation (1.1) is an example of how to make a referenced equation:

$$f(k) = \binom{n}{k} p^k (1-p)^{n-k} \tag{1.1}$$

Chapter 2

Methods

Methods chapter.

Chapter 3

First Results

First results chapter with Figure 3.1.

Figure 3.1: Car engine size versus fuel efficiency. The mpg data contains observations collected by the US Environmental Protection Agency on 38 models of car.

Notes The caption comes from the text following (ref:fig1-caption) and this has to be all

one line like so:

```
(ref:mpg-plot) Car engine size versus fuel efficiency. The mpg data contains  
observations collected by the US Environmental Protection Agency on 38 models of  
car.
```

Whilst the reference number to the figure itself comes from the code chunk name `fig1-chunk` inside the referencing syntax `\@ref(fig:fig1-chunk)`.

Chapter 4

Second Results

Second results chapter. Here's a reference: (Abe et al. 2009).

Table 4.1: A table of the first 10 rows of the mpg data set

manufacturer	model	displ	year	cyl	trans	drv	cty
